Use a spiral blade to minimize turning the project. Note: this project has many interior lines to give your finished piece character. Carefully start and stop your scroll saw blade following the lines as noted on the drawing.

1. Start with a piece of material about about 9 or 10" square.
2. Drill 1/16" dia. hole at the end of each line. Use the drill holes to insert blade. When completed, trim all cuts with razor knife and sand with 150 grit sandpaper. Stain or paint as desired.
